or by faxing in the registration form.

Must be received by **June 24, 2012**

Seating is LIMITED!

Attend a workshop that focuses on the design and construction of elevated structures on wood pile foundations. This workshop will cover Simpson Strong-Tie products, wood pile design & construction methods, and various structural connections for high wind regions. In addition, attendees will learn wind resistant connections to ensure a complete load path is established from the roof to the foundation. There will also be opportunities for interaction between attendees and instructors to discuss today's design and construction techniques. This class targets engineers, architects, and designers wood construction field. The workshop will be taught by a team of Simpson technical representatives and guest speakers including Bill Coulbourne P.E. from Applied Technology Council, and 5 PDH's/continuing education credits are available. Please see the back of this flier for course topics.

For more information contact 800-999-5099, extension # 3061
